Interconnection / Net Metering Process & Checklist

Phase I:

- LPEA Receives:
 - Interconnect/Net Metering Application
 - One-Line Diagram of RG System
 - Site Plan of RG System
 - Production Meter or Data Source for RG System

Phase II:

- LPEA reviews Interconnect/Net Metering Application
- LPEA performs Pre-Inspection

Phase III:

- LPEA Engineering Review
 - Interconnect request approved or
 - Certain requirements must be completed prior to obtaining approval for interconnection.

Phase IV:

- Installation Process
 - Installation of array
 - Production Meter
 - Accessible Disconnect
 - State Electrical Inspection

Phase V:

- LPEA Receives:
 - Certificate of Completion
 - State Electrical Permit
 - Evidence of Property Insurance – Showing personal liability of \$300,000 for 10kW systems and under, general liability of \$1,000,000 for 10kW to 500kW systems and \$2,000,000 in general liability for systems 500 kW to 2MW.
 - Renewable Energy Credit Contract (optional)
 - W9 (if submitting REC Contract)
- LPEA will schedule a meter change for Net Metering (if required)

Phase VI:

- LPEA performs Final Interconnect Inspection
 - Installers may be required to be present at final inspection

NOTE:

REC Contracts are available on a first come, first serve basis. The REC Contract must be completed and signed by applicant and LPEA. Completion of LPEA's final interconnection inspection establishes the REC Contract status. REC payments will be issued based on LPEA's Renewable Generation and Environmental Attributes Policy 359.

Required Documentation:

- Interconnect/Net Metering Application
- One-line Diagram of RG System
- Site Plan of RG System
- Production Meter or Data Source
- Interconnection Certificate of Completion
- State Electrical Inspection with Permit
- Evidence of Property Insurance
 - 10kW and under showing personal liability of \$300,000
 - Over 10 kW to 500kW showing general liability of \$1,000,000
- Renewable Energy Credit (REC) Contract – (optional)
- W9 (if submitting REC Contract) – (optional)
